## MicroSeal – Cuff Sealing Tape

A conformable polyethylene tape used to ensure an effective seal between the glove and garment in cleanroom gowning. Perforations at 3” intervals allow the user to bind and tear at the optimum length to secure the glove. The low-outgassing polyethylene film will remove cleanly, leaving no adhesive residue. Unlike more expensive competitive products used in aseptic and pharmaceutical gowning applications, the *SleeveSeal* tape is wound on a 3” plastic core with no liner – meaning less packaging and waste to discard.

The *SleeveSeal* tape is available in White in 2” and 3” widths. The 18-yard roll will seal approximately 42 gloves (21 applications).

<b>Backing:</b>	Low Density Polyethylene
<b>Adhesive:</b>	Pressure Sensitive Acrylic
<b>Adhesion to steel:</b>	12 oz./inch width
<b>Tensile Strength:</b>	12 lbs./inch width
<b>Total thickness:</b>	.0055”
<b>Elongation at break:</b>	500%
<b>Optimum Temp range:</b>	40°F to 190°F
<b>Chemical Resistance:</b>	Excellent
<b>Abrasion Resistance:</b>	Good
<b>Available Colors:</b>	White
<b>Length:</b>	Available in 18 and 36 yard lengths.
