CURTAIN CLEANER

A simple design that allows the operator to clean cleanroom vinyl curtains or softwall enclosures – both sides at the same time. The device works on a spring-loaded mechanism, which clamps the curtain at its uppermost connection, and then slides down to apply, or squeegee the cleaning agent at both sides of the curtain.

With a selection of different heads the Curtain Cleaner can cope with many cleaning challenges from critical and sterile environments to cleanroom support and industrial applications. The electropolished stainless steel Curtain Cleaner handle measures 48" in length and has replaceable cleaning cartridges measuring 12" in width. Cartridges are available in PVA, NovaLite NovaPoly or PolyMesh material with urethane foam interiors.

All cartridges can be laundered and re-used. NovaLite, NovaPoly and PolyMesh cartridges will hold up to alcohol, strong disinfectants and steam sterilization. Polyester covers are available Gamma Irradiated.

- **Designed for cleanroom use**
- **Simple and efficient**
- **Stainless Steel Frame**
- **Replaceable cleaning cartridges**
- **Autoclavable cleaning cartridges**

Curtain Cleaner – component parts:

CCH-48	Handle 48"	Stainless Steel
CCSC-1	SlipCover 12"	PVA
CCSC-2	SlipCover 12"	NovaLite
CCSC-6	SlipCover 12"	NovaPoly
CCSC-6IR	SlipCover 12"	NovaPoly (irradiated)
CCSC-68	SlipCover 12"	NovaPoly & PolyMesh
