

Isolator Tool

FEATURES

- **For Isolators, Containment and Bio-Hoods in Cleanroom and Buffer Areas**
- **Low Profile Design**
- **Angled head for easy application of disinfectant or detergent**
- **Selection of Widths (9", 14" , 18")**
- **Modular and extendable handles for small pass thrus and extended 'reach'**
- **Choice of Stainless Steel or Plastic Hardware**
- **Launderable/Autoclavable Slipcovers**
- **Slipcovers Available Irradiated**

A two-ply polyester mop head on an electropolished steel frame, the Isolator Tool rotates on a 360° angle to allow easy coverage of flat surfaces and ledges in Isolators and Containment Hoods.

The Quick Disconnect Adapter is available in Stainless Steel or Plastic and in three sizes – 9", 14" and 18". The flexible unit features a 7" handle that attaches to a variety of extender handles. This allows the unit to fit into small pass-thrus and docking devices but allows extended reach once assembled.

Covers can be laundered – where protocols allow - and will hold up to alcohol, strong disinfectants and steam sterilization.

Covers also available in MegaTex material for cleaning textured or heavily soiled surfaces and microfiber for increased absorbency.
