

Tank Tool

FEATURES

- **Designed specifically for clean and controlled environments**
- **Easily Clean Tanks and Cylinders**
- **Flexible head allows user to create custom curve.**
- **Provides better surface contact than handheld wipers**
- **Launderable**
- **Autoclavable**
- **Covers Available Irradiated**

Crafted from electropolished stainless steel with Delrin components, the Tank Tool is designed for cleaning tanks and cylinders in clean and controlled environments.

The flexible head can be 'bent to shape' by the user ensuring consistent surface contact. Featuring a quick disconnect adapter, the Tank Tool can be attached to any of the SSU series of fixed or extendible length handles. Available in two designs, Standard, for cleaning exteriors, and 'Reverse' for interior cleaning.

Covers are available in 100% Polyester, Microfiber for increased absorbency or MegaTex for cleaning heavy soils.
